Shared Living: Project Status

Teeno PDF (Product Blueprint, Target Market, Developer Brief) ke hisaab se: kya ho gaya, kya baaki hai, aur ab aapko kya karna hai. Pehle jo hissa "aadha" tha, uska code ab poora kar diya gaya hai.

Code: github.com/santwayne/Household (branch main). 56 automated tests pass. Dashboard real browser mein dekha gaya. Kabhi live nahi chala: asli WhatsApp number, asli Claude/OpenAI API, asli voice transcription (credentials nahi the). Inke adapters ko local fake servers se test kiya hai, jisse request ka shape sahi hai ye pata chalta hai, asli service ka behaviour nahi.

Status ke matlab

Status	Matlab
Ho gaya	Code poora aur tests mein verify.
Code ho gaya	Code poora aur test hua, par live credentials ya kisi insaan (expert, lawyer, native speaker) ki zaroorat hai.
Baaki	Bana hi nahi.
Aapko karna hai	Insaan ka kaam, code ka nahi.

6. Aapka agla step (is order mein)

#	Kaam	Kab	Kis ke liye
1	Repo ko Private karo (GitHub Settings)	Aaj	Business plan abhi public nahi chahiye
2	Manual pilot: 10-15 interviews, 10-20 households (pilot_kit.md)	Hafta 1-4	Dekhna ki log paise dete hain ya nahi
3	Meta rate card, Splitwise India price, KitchenOS try	Is hafte	Numbers verify
4	WhatsApp Business account, number, 3 templates approve	Pilot ke saath	Bot live karne ke liye
5	API key lagao, npm run eval, voice test	Number milte hi	AI aur voice ka asli test
6	Recipes, nutrition, Hindi/Punjabi replies, privacy notice ka review	Launch se pehle	Safety, trust, kanoon
7	Go/stop faisla: 50%+ active, 20%+ pay = go; 33% se kam active = stop	Hafta 4	Poora build ya segment badalna

Note: saare numbers, prices aur competitor claims assumptions/secondary sources par hain. Details: STATUS.md aur PILOT_DECISION.md (repo mein).
